CONSENT FOR CARE

Name: _____ DOB: _____ Account # _____
(for office use only)

The process of determining suitability of Chiropractic Services involves answering fully and truthfully all questions presented to you either written or spoken regarding your past and present health conditions during the Consultation.

If warranted, a physical examination will be performed that can include but is not limited to: vitals measurement, systems evaluation, orthopedic tests and maneuvers (tests that move and stress joints of the body), neurological test (tests using sharp or dull instruments, smells or sounds, gently tapping tendons) as well as physical touching. These test and maneuvers will help the Chiropractor determine what may be causing your complaints. Occasionally some temporary soreness and/or stiffness may occur due to the examination; less frequently aggravation of presenting symptoms or initiation of new symptoms.

Radiographs (X Rays) may be taken or ordered to further the Chiropractor's understanding of the underlying condition, positions and alignment of the spine and associated structures. There is limited but present risk to radiation exposure. If you are or think you may be pregnant alert the Chiropractor and/or X ray lab technician; X Rays are not allowed to pregnant women in any trimester.
